PROFESSIONAL SUMMARY

Computer Science graduate (B.E., 2025, CGPA 7.8/10) seeking an entry-level Data Analyst or Business Intelligence Analyst role. Hands-on experience with SQL, MySQL, Power BI, Excel and Python (Pandas, NumPy) through end-to-end analytics projects and two data-focused internships. Skilled in data cleaning, exploratory data analysis, data modeling, KPI reporting and dashboard development, with a focus on turning data into clear business recommendations. Available to join immediately.

TECHNICAL SKILLS

Languages & Databases: SQL, MySQL, Python (Pandas, NumPy)
BI & Visualization: Microsoft Power BI, Microsoft Excel, Dashboards, Data Visualization, KPI Reporting
Analytics: Data Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Data Modeling, Statistical Analysis, Business Intelligence
Other: Machine Learning (fundamentals), Generative AI, Git, GitHub, Problem Solving, Communication

PROJECTS

E-commerce Customer Intelligence Dashboard Mar 2026 – May 2026
MySQL, SQL, Power BI, Excel | github.com/Harshi1215/Ecommerce-Customer-Intelligence

- Structured 100K+ raw e-commerce order records from CSV files into relational MySQL tables.
- Wrote SQL queries using JOINs, GROUP BY and aggregations for customer segmentation, payment-trend and revenue analysis.
- Built an interactive Power BI dashboard tracking revenue KPIs, monthly sales trends, payment-method mix and top customer cities.
- Identified credit cards as the highest-revenue payment method.

NexDrop Delivery Trust Analysis (Case Study) Jun 2025 – Aug 2025
Python, SQL, Power BI | github.com/Harshi1215/nexdrop-delivery-trust-intelligence

- Generated a synthetic 7,500+ record dataset in Python for a fictional hyperlocal delivery platform.
- Used SQL to analyse ETA accuracy, delivery delays and customer dissatisfaction risk; built Power BI KPI scorecards.
- Found premium users faced longer delays despite faster promised ETAs (about 1 in 5 premium orders at dissatisfaction risk); recommended dynamic ETA prediction.

Brain Tumor Detection (Academic Team Project) Jun 2024 – Jan 2025
Python, NumPy, Machine Learning | github.com/Harshi1215/BRAIN-TUMORS-

- Worked with MRI image datasets and compared Random Forest, SVM, YOLOv5 and U-Net models, documenting accuracy trade-offs.

INTERNSHIPS

IoT Research Intern – Indian Institute of Technology Hyderabad Sep 2024 – Nov 2024
Hyderabad (Hybrid) | Python, Pandas, NumPy

- Cleaned and validated raw IoT sensor readings and organised them into a structured dataset for analysis.
- Analysed time-series sensor data in Python to identify performance and failure patterns across hardware test cycles.
- Combined hardware- and software-generated data into unified tables and summarised findings in reports for the research team.

Python Learning Intern – Skill Vertex Apr 2023 – Jun 2023
Remote | Python, Pandas, NumPy

- Wrote Python scripts using Pandas and NumPy for data manipulation and exploratory analysis on structured datasets.
- Cleaned raw data by handling missing values, duplicates and data-type mismatches.

EDUCATION

B.E., Computer Science and Engineering – Sathyabama Institute of Science & Technology, Chennai Oct 2021 – Jun 2025
CGPA: 7.8/10 | Relevant coursework: Database Management Systems (SQL), Data Structures & Algorithms, Python Programming, Probability & Statistics, Machine Learning

Fellowship Program in Applied Data Science with Generative AI – Crio.Do Jun 2026 – Present
In progress (expected Dec 2026); 7 of 9 sprints completed covering SQL, Python, data analytics and machine learning.

CERTIFICATIONS & ACTIVITIES

- Google Analytics Individual Qualification – Google (2024)
- Critical Thinking Assessment – TestGorilla, 98th percentile (2026)
- Led a student team organising a blood donation campaign; hackathon participant.
